

Caution for use

- *Adherend such as PVC coated steel plates that contain a large amount of plasticizer may cause adhesive residue, so please check carefully before use.
- *Store away from direct sunlight, in a well-ventilated room.
- *Please be aware that if the film is left for a long time or left outdoors, it may be difficult to peel off and may cause adhesive residue.
- *Be sure to perform a confirmation test when changing the usage conditions.
- *Dicing tape HAE-1500 series use DEHP (diethylhexyl phthalate), which is one of the specific phthalate esters. Other products do not use specific phthalates.
- *After use, dispose of it properly according to the law and regulations.

- *This product is not a chemical product in GHS, so SDS is not issued.
- *EU RoHS Directive (2011/65/EU) is not applicable when it is used as a temporary surface protection for electrical and electronic products (when it is not left as a part of the final component).
- *The items described in this material are based on our experimental results, but do not guarantee the characteristic values.
- *Please consider carefully before using.
- *We do not guarantee that the usage of this product and parts/equipment using this product will not conflict with the industrial property rights of third parties.
